DETAILED ACTION

1. The office action of 05/28/2004 was nonfinal.
2. Note St. Clair et al(US2002/0124049A1) with end stop sensors.
3. A STIC provided translation of DE 4201464 which was previously made of record is attached.
4. Applicants' DE10257008A1 and EP001426211A2 are made of record.
According to the various databases available to the examiner, no search report exists for the above EPO document. JP 2004-189210 has also been made of record.
5. Claims 1-9 are allowed.
6. This application is in condition for allowance except for the following formal matters:

In claim 5, last line it appears that "steps" should be changed to – stops – in view of pages 2, lines 25-26 of the detailed which refer to stops as opposed to steps. Note:

The nonlinear characteristic line of the function is defined by a support position table which can be vehicle-specifically parameterized in accordance with pull and press stages. The pull and press stops of the air spring and shock absorber assembly are protected against damage from forces which are too large because of such an end position hardening. End position buffers can therefore be substantially eliminated.

7. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO**
~~MONTHS~~ from the mailing date of this letter.
